REPORT ON VALUE ADDED COURSE ON "Chemistry in Every Day Life"

The department of **Chemistry** conducted a value added course in "**Chemistry in Every Day Life**" for the Science students. This course was designed and developed and conducted by Mr. **A. V. Shinde** for the department of **Chemistry**. The basic objectives of the course were to apply introductory chemical concepts and reasoning using the language of chemistry through the demonstration of an emerging ability to use effective written and/or oral communication. Explain at an emerging level how introductory chemistry impacts the natural and technological environments. Use detailed data collection, analysis and collaborative skills in order to explore introductory chemical principles, critically evaluate models, draw conclusions and communicate results at an emerging level. Solve problems encountered in introductory chemistry using appropriate computational and reasoning skills demonstrating an emerging understanding of chemical principles and collaborative skills.

The course was conducted for Academic Year 2022-23 for the duration of 30 hours. Based on the attendance and satisfactory performance in all the activities conducted throughout the course, the certificates were distributed to the students who completed the course.
